

Daniel Medeiros

Applied AI/HPC Researcher & Solutions Architect

- **Email:** daniel@kuriate.com.br
- **LinkedIn:** [linkedin.com/in/raijenki](https://www.linkedin.com/in/raijenki)
- **Location:** Stockholm, Sweden

Professional Summary

Solutions-oriented researcher and engineer with experience across HPC, cloud-native infrastructure, and applied AI. PhD from KTH Royal Institute of Technology specializing in scaling HPC workloads on cloud systems. Currently helping SMEs and public-sector organizations adopt AI through EuroHPC AI Factory initiatives at RISE Research Institutes of Sweden — designing proof-of-concepts, delivering technical demos, and onboarding customers onto GPU clusters. Proven ability to bridge deep technical expertise with customer-facing engagement, translating complex architectures into actionable solutions. Background spans GPU programming (CUDA, HIP, OpenCL), cluster management, containerized workflows, and end-to-end AI pipeline development on multi-node GPU systems.

Core Competencies

Domain	Technologies & Skills
HPC & System Management	Slurm, MPI, OpenMP, Bash, job scheduling, multi-node GPU workloads
GPU & Accelerated Computing	CUDA, HIP, OpenCL, multi-GPU distribution, profiling
Cloud & Orchestration	Kubernetes, Docker/Podman, Helm, Ceph Object Storage, Prometheus
AI/ML Frameworks	PyTorch, scikit-learn, OpenCV, Diffusers, MLflow, vLLM, llama.cpp
Programming	Python, C/C++
DevOps & CI/CD	Jenkins, Git, container registries
Customer Engagement	Technical demos, proof-of-concepts, pre-sales support, CRM (Pipedrive), trainings/workshop delivery

Professional Experience

Researcher — RISE Research Institutes of Sweden

2025 - Present | Stockholm, Sweden

- **AI Factory Solutions Architecture:** Design and deliver end-to-end AI proof-of-concepts for SMEs and public-sector organizations under the Swedish AI Factory (MIMER) and ENCCS projects, funded by EuroHPC-JU together with the Swedish state.
- **GPU Cluster Operations:** Deploy and optimize AI inference and generation pipelines on Leonardo/LUMI supercomputers infrastructure (NVIDIA A100 GPUs, AMD MI250X), including multi-GPU distribution, memory management, and containerized workloads via Slurm and Kubernetes.
- **Generative AI Demos:** Architected and delivered end-to-end pipelines for interactive AI demos for conference booth presentations, including real-time video generation, face-swapping, and voice cloning systems, managing the full stack from model selection to GPU resource allocation.
- **Customer & Partner Engagement:** Manage a lead pipeline via CRM, drive collaborations through startup incubators and AI events, and provide hands-on technical guidance to customers adopting HPC and AI infrastructure.
- **Training & Enablement:** Organize and deliver hackathons and technical workshops on GPU Programming, Cloud Computing, Containerization, and Distributed Systems for industry and academic audiences.

Geophysicist — Geological Survey of Brazil (SGB/CPRM)

2014 - 2021 | Rio de Janeiro, Brazil

- **Automation & Software Development:** Built Python-based tools and plugins for ArcGIS and Oasis montaj (GDAL, GeoPandas), automating geophysical data workflows and reducing manual processing time.
- **Data Processing:** Managed acquisition, quality control, and processing of aerogeophysical datasets (gravimetric, magnetic, spectrometric) at national survey scale.
- **Scientific Output:** Co-authored book chapters, technical reports, and regional geological maps published by the Brazilian geological survey.

Education

PhD in Computer Science — KTH Royal Institute of Technology

2021 - 2025 | *Stockholm, Sweden*

- **Thesis:** "Towards Adaptive Resource Management for HPC Workloads in Cloud Environments"
- **EU Research Projects:** Coordinated 3 Work Package deliverables and co-authored 1 for Horizon Europe projects (OpenCUBE, IO-SEA), involving multi-partner collaboration across European HPC centers.
- **Key research areas:** Cloud-native HPC, container orchestration on GPU clusters, performance benchmarking, and scheduling optimization.

MSc in Computer Science — Universidade Federal da Bahia

2019 - 2021 | *Salvador, Brazil*

- **Thesis:** "Intelligent scheduling of search queries using Elasticsearch on DVFS-enabled processors".
- **Relevant coursework:** Real-Time Systems, Machine Learning, Applied Statistics.

BSc in Geophysics — Universidade Federal do Rio Grande do Norte

2010 - 2013 | *Natal, Brazil*

- Geophysics of Petroleum Exploration, Seismic Data Processing, Reservoir Geophysics.

Selected Projects & Technical Highlights

- **Real-Time AI Video Generation Pipeline:** Architected an interactive image-to-video generation system using LTX-Video/LTX-2 models on distributed A100 GPU nodes, with Gradio interfaces, SLURM job orchestration, and automated monitoring/notification. Deployed live at TechArena 2026 (Strawberry Arena) for conference attendees.
- **LLM Inference Infrastructure for AI Hackathons:** Designed and deployed a full Kubernetes-based LLM serving stack on H100 GPUs (ICEDC), including vLLM endpoints for multiple model sizes, FastMCP tool servers, serving 50+ concurrent participants.
- **Container-Native HPC Workflows:** Developed and operated containerized AI/HPC workloads on Kubernetes and SLURM-managed clusters with GPU-aware scheduling and object storage.
- **HPC Onboarding for Enterprise & Public Sector:** Guided startups, SMEs, and public sector organizations through deployments on EuroHPC supercomputers (LUMI, Leonardo), from environment setup and job scheduling to scaling production ML pipelines and migrating from proprietary AI services (OpenAI, Gemini) to self-hosted open-source models.

Leadership & Community

- **PhD Chapter at KTH (2022-2024):** Represented 1,500+ doctoral students on KTH's highest governing body (*Universitetsstyrelsen*). Served as Chairperson, Auditor, and Webmaster of the PhD Chapter in different terms; managed a 1M SEK annual budget and a team of 10+ representatives.
- **Sveriges förenade studentkårer - Doktorandkommittén (2024-2025):** Elected member to the committee that represents over 17,000 doctoral students in Sweden, directly engaging in related important questions for the community such as migration aspects, and the third-level course database.
- **Action10.org (2025):** Webmaster, redesigned the organization's website to improve donor and audience engagement.

Languages

- **English:** Fluent
- **Portuguese:** Native
- **Swedish:** Intermediate proficiency (*Svenska som Andraspråk 3*)
